OK. Just go ahead and do that, then.

Others can try and review/comment via e-mail.

At a minimum, I will make it a point to discuss the charge with Vince later this week when he is back.

If necessary, I will set up the meeting I mentioned myself.

I will be out of the office the 17-25<sup>th</sup>. I can send the charge around to IRIS management for review when done. Kathleen is looking at it now.

**Importance:** High

Correct that we shouldn't use Ammonia as a template.  
It did not have significant enough changes made.

Sam indicated that the B[a]P one was being revised.

I understand from Jamie that it is not complete AND that it has not yet been vetted with Samantha.  
However – Sam suggested that – since it was currently being revised based on her guidance and what we learned from the TMB panel, it would be a good place to start.

It is OK for us to send ETBE and TBA out to Agency review and note the charge will follow.

Therefore, it does not need to be finalized right now – BUT – we do have to get moving on them – as well as the ones for RDX and n-butanol.

Jamie – once you have finished a draft of the B[a]P charge, can you please schedule a meeting for you, Kathleen and Sam to go over – but also invite the CMs and managers for ETBE/TBA/RDX and n-butanol so they can be looped in to the process?

Maybe aim for the 17<sup>th</sup>/18<sup>th</sup> – after the Ammonia panel and after Sam's return?

Thanks.

I'm forwarding the slightly revised ammonia charge, but it should not be used as a model since all we did was to add some section numbers to reduce confusion on the part of CAAC members (in light of experience from the TMB meeting). Just to keep you in the loop.

I'm assuming we don't need to worry about the ETBE/TBA/RDX charges – at least for the next week or two.

Hi Ravi & Marty,

Based on the Mgt meeting discussion this morning, it would be great if you could send me your ETBE & TBA comments ASAP so the teams can get started on them.
